October 27, 2008

Clem, check out my website [www.drbobrosszog.com](http://www.drbobrosszog.com) , and I did it all myself thanks to you. I attended your Web Center Training on October 18 in Pittsburgh and the very next day designed my own web site for my Dental practice. You are a great teacher!

I got the site registered today and sent the link out to my colleagues by e-mail. The response to the site has been phenomenal. Everyone loved it and wanted to know how many thousands of dollars I paid to have it done. They cannot believe it when I tell them I did it myself. Several colleagues have expressed an interest in having a website done for them. I have an appointment next Monday with an Orthodontist for the possible sale of a web site.

I have had quotes to build a website for my practice over the past year starting at \$5000 and up. That is why I never had one done. MA Web Centers made it affordable for me to build a professional web site that I was able to link to my NutraMetrix web site. I love that I can edit the content anytime. This is truly amazing software.

Clem thanks again!

Dr. Bob
